

Gear and Tuning Guide

Hello, fellow **AvenueXTRAs**!

It is I, **DFBB**, here to guide you through gearing and how to get **OP gear**!

Tired of your DPS hitting like a wet noodle? Want to smack that boss all the way to the top of the DPS charts like an absolute sweaty CHAD?

Worry not.

Here are the basics of understanding the mechanics behind gearing and tuning in **Where Winds Meet**.

First, you need to understand that getting good rolls depends heavily on **RNG**. May **RNGesus** be with you!

Weapons and Armor Base Rolls

Finding a good **base roll** on your gear is mandatory.

The **first base stat** on a piece of gear has a chance of appearing again as you continue tuning and unlocking additional stat slots. For example, if you receive a brand-new piece of armor with **Affinity Rate** as its base stat, that stat has a chance to roll again while tuning.

Because of this, **always save purple gear** if it has a desirable first base stat. Legendary (gold) gear isn't the only gear worth keeping.

Also, **base rolls cannot be re-tuned**, so getting a good base stat is extremely important. A gold-quality base stat is even better, but it isn't mandatory.

Possible Base Rolls

Primary & Secondary Weapons

- Max Physical Damage
- Momentum
- Agility
- One Minimum Attribute Damage stat (Bellstrike, Stonesplit, Bamboo Cut, etc.)
- One Maximum Attribute Damage stat
- Min Void Damage (acts as Attribute Damage and benefits any class or weapon)
- Max Void Damage

Disc & Pendant

- Max Physical Damage
- Min Physical Damage

Helmet & Armor

- Affinity Rate
- Critical Rate
- Precision Rate
- Max HP
- Body
- Physical Defense

Greaves & Bracers

- Power
 - Affinity Rate
 - Critical Rate
 - Precision Rate
 - Max HP
 - Body
 - Physical Defense
-

General Rule

If your goal is to maximize DPS, **avoid defensive stats** unless you're intentionally building a meme tank.

Every stat should contribute toward offence whenever possible.

"But little Timmy asks..."

"What stats should I choose for my Path? I have no idea!"

Fear not, my son, for DFBB is here!

Here are the stats you should prioritize for each Path in **Where Winds Meet**.

Bellstrike Path

Rules

1. Maintain **40% Affinity Rate**. **DO NOT OVERCAP!** The sweet spot is **39–40%**.
 2. Keep **Critical Rate** and **Precision Rate** as low as possible to maximise Affinity double-dipping.
 3. Stack **Momentum** until you reach 40% Affinity Rate, then prioritise **Power** and **Max Physical Damage**.
 4. Re-roll or avoid the following whenever possible:
 - Min Bellstrike Damage
 - Min Void Damage
 - Min Physical Damage
 - Any Attribute Damage that isn't Bellstrike
 - Defensive stats
 - Penetration stats unrelated to Bellstrike
-

Primary & Secondary Weapons

S-Tier Stats

- Art of Sword/Spear Damage Boost
- Momentum
- Power
- Max Physical Damage
- Affinity Rate
- Physical Penetration

Okay Tier (if you have no better option)

- Max Void Damage
 - Max Bellstrike Damage
 - Critical Rate
 - Precision Rate
 - Formless Penetration
 - Bellstrike Penetration
-

Disc & Pendant

S-Tier Stats

- All Martial Arts Boost
- Momentum
- Power
- Max Physical Damage
- Affinity Rate
- Physical Penetration

Okay Tier

- Max Void Damage
 - Max Bellstrike Damage
 - Critical Rate
 - Precision Rate
 - Formless Penetration
 - Bellstrike Penetration
-

Helmet & Armor

S-Tier Stats

- Momentum
- Power
- Max Physical Damage
- Affinity Rate
- Sword Charge Damage (Nameless build)
- Strategic Sword Special Skill Damage (Strategic build)

Okay Tier

- Max Void Damage
- Max Bellstrike Damage
- Critical Rate
- Precision Rate
- Other Nameless or Strategic abilities relevant to your build

Optional

If you're lucky enough to roll these alongside multiple S-Tier stats, they're worth keeping:

- Area Mystic Skill Damage
- Area Debuff Damage Boost
- Single Target Damage Boost

Otherwise, prioritise maxing out your core S-Tier stats.

Greaves & Bracers

S-Tier Stats

- Boss Damage Boost (PvE)
- Player Damage Boost (PvP/GvG)
- Momentum
- Power
- Max Physical Damage
- Affinity Rate
- Sword Charge Damage (Nameless build)
- Strategic Sword Special Skill Damage (Strategic build)

Okay Tier

- Max Void Damage
 - Max Bellstrike Damage
 - Critical Rate
 - Precision Rate
 - Other Nameless or Strategic abilities relevant to your build
-

All Other Paths

Rules

1. Maintain **80% Critical Rate**. **DO NOT OVERCAP!** Being 1–2% under is perfectly fine.
 2. Maintain **100% Precision Rate**. **DO NOT OVERCAP!** Being 1–2% under is also acceptable.
 3. Stack **Agility** until you reach 80% Critical Rate, then prioritise **Power**.
 4. Choose **one** of the following builds:
 - Stack **Min Physical Damage** (ideal for healers)
 - Stack **Max Physical Damage**
 5. Don't mix both unless you're experimenting.
 6. Re-roll or avoid:
 - Attribute Damage unrelated to your Path
 - Defensive stats
 - Penetration stats unrelated to your Path
-

Primary & Secondary Weapons

S-Tier Stats

- Art of (Your Weapon) Damage Boost
- Agility
- Power
- Max Physical Damage
- Critical Rate
- Min Physical Damage
- Physical Penetration

Okay Tier

- Max Void Damage
 - Max Attribute Damage for your Path
 - Precision Rate
 - Formless Penetration
 - Path Penetration relevant to your Path
-

Disc & Pendant

S-Tier Stats

- All Martial Arts Boost
- Agility
- Power
- Max Physical Damage
- Critical Rate
- Min Physical Damage
- Physical Penetration

Okay Tier

- Max Void Damage
 - Max Attribute Damage for your Path
 - Precision Rate
 - Formless Penetration
 - Path Penetration relevant to your Path
-

Helmet & Armor

S-Tier Stats

- | | |
|-----------|-----------------------|
| • Agility | • Max Physical Damage |
| • Power | • Min Physical Damage |
| | • Critical Rate |

If you're a healer or rely heavily on Mystic Skill Damage, the following are also highly valuable:

- Area Mystic Skill Damage
- Area Debuff Damage Boost
- Single Target Damage Boost

Choose your final attunement based on the abilities you use most often.

Okay Tier

- Max Void Damage
 - Max Attribute Damage for your Path
 - Precision Rate
 - Path-specific ability bonuses
-

Greaves & Bracers

S-Tier Stats

- Boss Damage Boost (PvE)
- Player Damage Boost (PvP/GvG)
- Agility
- Power
- Max Physical Damage
- Min Physical Damage
- Critical Rate

Choose your final attunement based on the abilities you use most often.

Okay Tier

- Max Void Damage
 - Max Attribute Damage for your Path
 - Precision Rate
 - Path-specific ability bonuses
-

Final Thoughts

Hopefully, this guide helps you become a **sweaty CHAD DPS...**

...or a **CHAD healer**. Gotta show some love to the healers too.

If you have any questions about gearing, tuning, or builds, feel free to ask! I'm almost always online after **7:00-8:00 PM EST** and happy to help.

Good luck, and may **RNGesus** bless your rolls.
